2002 California Stone

Anything below 4 degrees open ECU considers bike to be at idle (as seen by 'flag' on diagnostic program)

Anything above 80.5 degrees open ECU considers bike to be at WOT (as seen by 'flag' on diagnostic program)

No diff in voltage noticed when bike was running

bike idles at 1175 rpm, 3.6 degrees throttle opening, -5 fuel trim

bike runs real damn good
